

## Senior Qt Developer

In case you are a person who is brave enough to choose:

**Fighting the status quo VS Following instructions**

**Building it alone VS Upgrading it**

**Solving issues VS Fixing problems**

**Inspired by change VS Seeking comfort**

We are growing our software team with Senior Qt Developer, eager to expand his/her limits and participate in the creation of something that will make significant industry change.

### Main responsibilities include:

- Ability to autonomously use creativity to develop elegant and exciting solutions to real-life problems. Develop new software solutions and maintain existing solutions
  - Analyze business requirements from a variety of sources and assimilate and interpret into written technical specification documents;
  - Use 3D graphics and blender to create sustainable solutions;
  - Perform coding to written technical specifications, including using Qt;
  - Also responsible for creating/updating internal standards and design guidelines;
  - Create, document, and implement unit test plans, scripts, and test harnesses;
  - Assist in the implementation of other automated test frameworks;
  - Keep informed of business priorities and make decisions based on the shared business goals of the organization;
- Collaborate, and provide some technical supervision and support to other members of the team
- Proactively perform other related duties as and when required;
  - Reliably report regarding assignments status, obstacles and problems;

### Core skills required:

- At least 3 years of experience with Graphics and 3D modeling;
- Minimum 2 year of experience with QT and QTGui;
- Mathematical background;
- Have experience with Git and/or other distributed revision control systems;
- Robust personality;
- Ability to work independently in a dynamic environment, flexibility;
- Strong analytic view combined with pragmatic attitude;
- Open communication attitude: active listening and giving feedback;
- Excellent control of the English language.

### You will impress us if you have knowledge and/or experience in:

- Blender and/or similar 3D CAD software;
- Programming with Python;
- Building cross-platform desktop applications;
- Using/scripting 3D modelling software;
- OpenGL and GLSL/HLSL.

### With us you will benefit from:

- A culture that values learning and mastery;
- Bright co-workers in a nice and stimulating environment;
  - Working in an agile and fast-paced company;
  - Autonomy and some flexibility in working time to fit your lifestyle and optimal work conditions;
  - Knowing that your works truly helps to make peoples' lives better

**Allow yourself to be inspired. Create. Lead. Grow.**
